VOLUME 3 (1989)
TABLE OF CONTENTS

Number 1

Tumorigenic conversion of NIH 3T3 cells by transfection with Shope fibroma virus DNA ..... *K. M. Obom and B. G.-T. Pogo* 5

Structural analysis of human papillomavirus type 6c isolates from condyloma acuminatum and juvenile-onset and adult-onset laryngeal papillomata ..... *L. Metcalfe, S.-L. Chen and P. Mounts* 11

Serological probes for some foot-and-mouth disease virus nonstructural proteins ..... *M. Tesar, H.-G. Berger and O. Marquardt* 29

Differential inhibition of downstream gene expression by the cauliflower mosaic virus 35S RNA leader ..... *J. Futterer, K. Gordon, P. Pfeiffer, H. Sanfaçon, B. Pisan, J.-M. Bonneville and T. Hohn* 45

The influence of the herpes simplex virus-1 DNA template environment on the regulation of gene expression ..... *K. Leary, H. H. Yim, L. B. Zhou, R. E. Sekulovich and R. M. Sandri-Goldin* 57

Isolation and characterization of a family of rat endogenous retroviral sequences ..... *M. Nakamuta, M. Furuich, K. Takahashi, N. Suzuki, H. Endo and M. Yamamoto* 69

Viewpoint: RNA viruses as gene expression vectors ..... *H. V. Huang, C. M. Rice, C. Xiong and S. Schlesinger* 85

Number 2

A region of basic amino-acid cluster in HIV-1 Tat protein is essential for *trans*-acting activity and nucleolar localization ..... *S. Endo, S. Kubota, H. Siomi, A. Adachi, S. Oroszlan, M. Maki and M. Hatanaka* 99

Monoclonal antibody analysis of influenza virus matrix protein epitopes involved in transcription inhibition ..... *R. W. Hankins, K. Nagata, D. J. Bucher, S. Popple and A. Ishihama* 111

Comparison of the sequence of the secretory glycoprotein A (gA) gene in Md5 and BC-1 strains of Marek's disease virus type 1..... *T. Ihara, A. Kato, S. Ueda, A. Ishihama and K. Hirai* 127

Characterization of human T-cell lines harboring defective human immunodeficiency virus type 1 ..... *Y. Hamamoto, K. Takamatsu, S. K. Kobayashi, K. Yamaguchi, N. Yamamoto and N. Kobayashi* 141

Characterization of human T-cell lines harboring defective human immunodeficiency virus type 1 ..... *Y. Hamamoto, K. Takamatsu, S. K. Kobayashi, K. Yamaguchi, N. Yamamoto and N. Kobayashi* 141

Expression of post-transcriptional regulatory gene of HTLV-I *rex*, in *Escherichia coli* ..... *Z.-A. Zhou, Y. Adachi, M. Maki and M. Hatanaka* 153

Genomic characterization of molluscum contagiosum virus type 1: Identification of the repetitive DNA sequences in the viral genome ..... *J. Bugert, A. Rösen-Wolff and G. Darai* 159

Nucleotide sequence and transcriptional studies of the vaccinia virus K*pn*I I DNA fragment ..... *L. A. Tengelsen and D. E. Hruby* 175

Number 3

Comparative analysis of the retroviral *pol* and *env* protein sequences reveal different evolutionary trees ..... *G. Lewe and R.M. Flügel* 195

Disease symptoms in transgenic tobacco induced by integrated gene VI of cauliflower mosaic virus ..... *E. Balázs* 205

Transient expression assay for qualitative assessment of gene expression by fowlpox virus ..... *S. Dhawale, C.E. Beisel and K. Nazerian* 213

A major transcript of human papillomavirus type 16 in transformed NIH 3T3 cells contains polycistronic mRNA encoding E7, E5, and E1^E4 fusion gene ..... *A. Taniguchi and S. Yasumoto* 221

Intracellular processing and immunogenicity of the envelope proteins of human T-cell leukemia virus type I that are expressed from recombinant vaccinia viruses ..... *M. Seki, H. Sashiyama, M. Hayami and H. Shida* 235

Avian endogenous provirus (ev-3) *env* gene sequencing: Implication for pathogenic retrovirus origination ..... *A.T. Tikhonenko and O.L. Lomovskaya* 251

Molecular cloning and primary structure analysis of the mouse mammary tumor virus-related element from dwarf hamster genome ..... *A.T. Tikhonenko, N.S. Vassetzky III, T.V. Golovkina and A.V. Gudkov* 259

Congress Reports: Recent progress in cytomegalovirus research ..... *J.D. Benson and E.-S. Huang* 263

Viewpoint: Putative antigenic domains in glycoprotein G of rabies virus: Is the RGK sequence involved in virus adsorption to cellular receptors? ..... *Y. Becker* 277

Number 4

Characterization of the gene encoding herpesvirus of turkeys gp57-65: Comparison to Marek's disease virus gp57-65 and herpes simplex virus glycoprotein C ..... *P. M. Coussens, M. R. Wilson, H. Camp, H. Roehl, R. J. Isfort and L. F. Velicer* 291

Marek's disease virus gene clones encoding virus-specific phosphorylated polypeptides and serological characterization of fusion proteins ..... *Z. Cui, D. Yan and L. F. Lee* 309

Computer predictions of antigenic domains in human immunodeficiency virus-1 envelope glycoprotein: Comparison with reported experimental data ..... *Y. Becker* 323

Neutralization of purified herpes simplex virus DNA polymerase by two anti-peptide sera ..... *J. T. Matthews, J. T. Stevens, B. J. Terry, C. W. Cianci and M. L. Haffey* 343

Anchoring a vaccinia virus promoter in the nucleus prevents its *trans*-activation by viral infection ..... *J. N. Miner, A. Tamin and D. E. Hruby* 355

Nucleotide sequence of the gene encoding the matrix protein of mumps virus (Miyahara strain) ..... *K. Tanabayashi, K. Takeuchi, M. Hishiyama, A. Yamada and A. Sugiura* 361

Herpes simplex virus encoded ribonucleotide reductase: Evidence for the dissociation/reassociation of the holoenzyme ..... *A. J. Darling, E. M. McKay, R. Ingemarson and B. Booth* 367

Unexpected close relationship between the large non-virion proteins of filamentous potexviruses and spherical tymoviruses ..... *M. N. Rozanov, S. Y. Morozov, and K. G. Skryabin* 373
